

HMA SUBMARINE AE2

*SHE LIES DEEP, THE HEROES ARE GONE,
NOW THEIR STORY SHOULD FINALLY BE TOLD*

HMA Submarine AE2 'running amok in the Narrows'

Painting by Phil Belbin courtesy of the RAN

Just before dawn on 25 April 1915, as the first boatloads of soldiers were approaching the the Gallipoli Peninsula, the Royal Australian Navy submarine HMAS AE2 came under fire from Turkish shore batteries and dived, having entered the heavily mined waters of the Dardanelles Strait two hours earlier. These were minefields that had already claimed three battleships of the British and French fleets and severely damaged three others.

Her mission was to create a diversion to the landings by 'running amok in the Narrows' and then enter the Turkish inland Sea of Marmara to cut the supply lines of the Ottoman army. Two other Allied submarines had tried and failed the same task, resulting in their destruction.

Despite fierce Turkish opposition and against all odds, AE2 succeeded. History suggests that a characteristically Australian approach, encompassing skill, bravery, fortitude and luck meant she was the first of the Allied submarines to breach the Straits causing great disruption to Turkish reinforcements moving on and around the Sea of Marmara.

Her campaign ended five days later on 30 April 1915. The AE2 was lost, scuttled by her crew after being fatally damaged in an engagement with the Turkish torpedo-boat SULTANHISAR. Her crew of 32 was taken as prisoners of war.

The Crew of HMA Submarine AE2

For more than 80 years, she lay hidden beneath the waters of the Sea of Marmara, undiscovered despite repeated attempts to locate the missing submarine, her story almost unknown except to a few historians. All this changed when, in 1998, after three long years of hard research, Turkish museum director and wreck explorer, Mr. Selcuk Kolay found AE2 sitting intact and upright on the bottom in 73m of water - her final resting place.

The Gallipoli 2006 Campaign

The Australian Government has agreed to support the Submarine Institute of Australia (SIA) in developing a feasibility plan to preserve AE2 and tell the story of her brave crew.

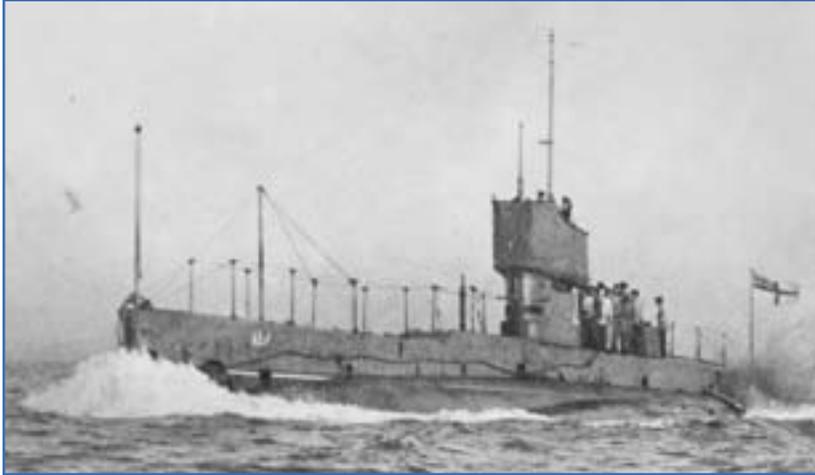

The SIA, supported by the Defence Science and Technology Organisation and sponsors, proposes to conduct a survey of the submarine in the northern autumn of 2006 using divers and a Remotely Operated Vehicle to ascertain its material state, enabling recommendations to be made to the Turkish and Australian Governments on the way ahead, targeted at the centenary of the landings in 2015.

The SIA seeks indications of interest from potential partners to support these efforts and participate in implementing the agreed future to preserve AE2 and recognise Australia's silent heroes of Gallipoli.

THIS IS AN OPPORTUNITY TO BECOME INVOLVED IN THIS UNIQUE PROJECT TO PRESERVE ONE OF AUSTRALIA'S FEW, REMAINING, SIGNIFICANT WORLD WAR I RELICS AND TO ENSURE THE STORY OF THE EXPLOITS OF HER HEROIC CREW IS TOLD AS PART OF THE ANZAC CENTENARY IN 2015.

HMA Submarine AE2

The SIA estimates that this project will cost in excess of \$A6m over the next 10 years and is establishing a Trust for which Tax Deductibility will be sought.

In the first instance, potential sponsors (either financial or in kind) should contact the Submarine Institute of Australia:
